KEYMACRO is a multi-function application that assists you in recording and editing your keyboard macros, which you can play back later on. Keyboard macros are helpful in creating complex multitasking solutions that allow you to launch and execute multiple programs simultaneously. For example, you can record a macro that will launch a specific web browser to open a specific website, launch a PowerPoint presentation, and open a specific document file. It might seem to be more than just a simple software for learning a few keyboard shortcuts, but instead, it offers additional features, such as dragging, zooming, cropping, deleting files, or changing the speed of the playback, which can make things even more complicated. The application also lets you record your own sounds, which can then be used to create new keyboard macros or simply import existing MP3 and WAV files. It is available for both Windows and Mac OS, and supports most of the most recent versions of both platforms. KEYMACRO supports most of the most recent keyboard shortcuts, so you don't have to memorize the system shortcuts. It also features an intuitive, easy-to-use interface that makes the application extremely easy to understand, even for novice users. You can create your own keyboard macros with the click of a button, customize the existing ones, or import previously recorded sounds. The program offers a variety of integrated audio recording options, including a microphone, a line in, or an external device, so you can get your own recorded sounds right away. Another interesting feature is the audio editor, which provides you with all of the tools necessary to edit your own sounds. The application includes a built-in compressor, an audio recorder, a volume limiter, and others. KEYMACRO supports most of the most recent multimedia formats, which means it can easily import and export audio and video files. The program is able to play back your keyboard macros and integrate with AutoHotkey, which is a very convenient tool that allows you to automate all the keyboard shortcuts. KeyMACRO Description: KeyMACRO is a simple and intuitive software designed to help you create and playback your own keyboard macros. The utility allows you to drag and drop files directly into the main panel, so you don't need to bother with the menus or settings. You can configure the program to help you choose the specific keys for the creation of your new macro, assign a specific keyboard shortcut, and assign a sound to each button. 2edc1e01e8
